CYBER SECURITY LAB – TRYHACKME

Introduction to Cyber Security

AIM

To understand the basic concepts of Cyber Security through the TryHackMe platform by completing the Offensive Security Intro, Defensive Security Intro, and Careers in Cyber rooms.

OBSERVATION

The TryHackMe rooms were completed successfully. The Offensive Security Intro room demonstrated ethical hacking and safe website testing. The Defensive Security Intro room introduced the role of cyber defenders in identifying and stopping attacks. The Careers in Cyber room provided an introduction to different opportunities and career paths in Cyber Security. All three displayed a room completion of 100%.

PROCEDURE

1. Open the TryHackMe website and log in to the account.

2. Navigate to Learn → Pre Security → Introduction to Cyber Security.

3. Open the Offensive Security Intro room and complete all the given tasks in the safe environment.

4. Open the Defensive Security Intro room and complete the tasks related to identifying and stopping attacks.

5. Open the Careers in Cyber room and complete the tasks about Cyber Security careers and career paths.

6. Verify that each room shows 100% completion.

7. Record the completed rooms using screenshots as evidence.
